Substantive session of 1998
New York, 6-31 July 1998
Item 1 of the provisional agenda
Adoption of the agenda and other organizational matters

Annotated provisional agenda

Addendum

7. Coordination, programme and other questions

(d) International cooperation in the field of informatics

At its fifty-second session, on 26 June 1998, the General Assembly adopted a resolution entitled "Global implications of the year 2000 date conversion problem of computers". The General Assembly, appreciating the efforts of the Ad Hoc Open-ended Working Group on Informatics of the Economic and Social Council in raising the level of awareness of the year 2000 problem, requested the Secretary-General to take steps to ensure that all parts of the United Nations system take measures to ensure that their computers and equipment with embedded microprocessors are year 2000 compliant well before the target date by drawing up a plan of action for the United Nations system and called upon the Council to prepare at its substantive session of 1998 guidelines on which Member States would be able to draw in addressing the diverse aspects of the year 2000 problem (resolution 52/233).
